

Living future

Join us in building the society of tomorrow. With global ecological standards, local employment and meaningful future impact.

Natural resources

In an ideal world, there is no waste. As raw materials are reused until they become food for new materials.

Without polluting or disturbing primordial cycles.

Circular supplychain

With the knowledge of the value from the monolithic building materials, we can rebuild, in true Cradle to cradle fashion. The prefabricated laser-cut 'moonwood' panels, are assembled within a few days on site.

The structural building code allows to build different styles and sizes on the developed shells, ranging from 30 to 300 square meters in surface, all to customer wishes.

Conscious Society

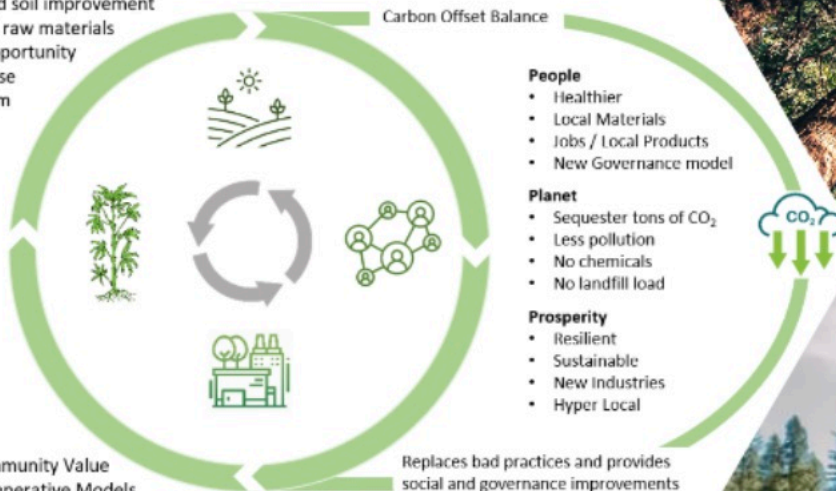

Natural Cycles

As trees grow, rivers flow and seeds blossom, the cycles of nature are ever lasting.

These cycles saw the daylight before us and will see it after us.

Land Use

- Land re-use and soil improvement
- Local source of raw materials
- Educational Opportunity
- Efficient land use
- New Jobs - Farm

People

- Healthier
- Local Materials
- Jobs / Local Products
- New Governance model

Planet

- Sequester tons of CO₂
- Less pollution
- No chemicals
- No landfill load

Prosperity

- Resilient
- Sustainable
- New Industries
- Hyper Local

Urban

- Social and Community Value
- Clean and Regenerative Models
- New Jobs – Retail and Commercial
- Multiple new products (fiber, hurd, seed)
- Bio fiber market supports multiple industries

Learning about and incorporating humanity into natural cycles is part of our core mission.

Positive sum game

Collective endeavour

Working with natural cycles in order for production and manufacturing to have a positive impact on society, economy and our planet's health. A traditional forest plan spans at least over 60 years, to ensure healthy biodiverse regrowth.

By collectively investing into the long term health of our environment, we can guarantee valuable & qualitative resources in the future.

Therefore our efforts go from restoration to preservation and education.

Invest and collaborate with us, to:

- Rebuild nature.
- Facilitate the creation of living spaces for generations.
- Set new societal standards of housing and living.
- Build and re-invest circularly.
- Build custom settlements quickly with holistic impact from micro- to macrocosm.
- Create a platform and stage for new innovations.
- Re-introduce ourselves with our fundamental nature and existence as humans.
